High-speed doors for high-speed cars

EFAFLEX builds doors for Porsche in Vietnam

Each of the two companies is a specialist in its field and stands for reliability, fastness and high-quality design: the cars of Porsche and the high-speed doors of EFAFLEX have joined in Vietnamese Ho Chi Minh City not long ago. The door specialist for high-speed industrial doors has installed four high-speed turbo doors in the Porsche Centre Saigon.

Peer Marzahn, After Sales Director of Prestige Sports Cars Co. Ltd., the official Porsche importer for Vietnam, decided for the door manufacturer from Bruckberg, Lower Bavaria, for two reasons: "The technology of these doors, their very high opening and closing speed are absolutely convincing." In order to perfectly put the fast luxury cars in a favourable light, the four EFA-STT® are completely made of transparent laths. "The modern design of the doors perfectly matches the Corporate Identity of Porsche", gives Peer Marzahn as another reason for having chosen these doors. The Porsche Centre, which was opened in January 2009, is situated directly within the new Business District of Ho Chi Minh City. The after sales area with workshop and check-in has a surface of 400 m² and the new show room has another 400 m². Six cars are permanently presented to the clientele there.
