

## One hundred clean room doors for a pharmaceutical giant

EFAFLEX supplies special doors to Turkish medicines manufacturer Abdi Ibrahim

**Abdi Ibrahim, the leading company in the Turkish pharmaceutical industry, recently ordered one hundred clean room doors for an extension to its facility which will manufacture generics. EFAFLEX, the specialist for a wide range of industry solutions in the area of high-speed industrial doors, delivered and installed the doors in May 2022.**

It should come as no surprise that the choice fell to order the 100 EFA-SRT®-CR. The two companies have been working closely together since 2011 and have previously completed other projects to deliver bespoke solutions on this basis.

The decision to use EFAFLEX doors for the extension to the facility was based on the product's compact smart construction, and their excellent airtightness.

### Compact and air-tight

The CR version of the EFA-SRT® is the ideal closing solution for rooms with different pressure conditions. After all, even with high pressure on the door curtain, the air exchange is consistently reduced to a minimum, which increases the service life of air filters. The rapid opening and closing reduces the loss of air and therefore increases the efficiency of the clean room.

The EFAFLEX CR Series clean room doors have been awarded the ISO class 5 (254 EFA-SRT CR Premium) and/or ISO class 6 (678 EFA-SRT CR Efficient and 675 EFA-STT CR) from TÜV Süd as regards air particle purity. They are perfectly adapted to the requirements in controlled production zones and ensure that the access points are virtually airtight. The high performance high-speed doors have a smooth surface structure and don't have any protruding edges. They can be easily cleaned and

depositing of particles can largely be eliminated. The GMP-compatible door types in the CR series are largely made from V2A. Like all EFAFLEX high-speed doors, thanks to their excellent quality, their clean room doors are exceptionally heavy duty and low maintenance.

The doors are hygienic and edge free, and for the pharmaceutical sector, they therefore offer the ideal conditions for the specialist requirements in the laboratory and during the production of medicines, medical technology, and special protective equipment.

### **Large observation windows for added safety**

At Abdi Ibrahim, the doors are used to allow people and materials access to the clean room area. The designers at the Turkish pharmaceutical giant ordered all the doors with a particularly large viewing window. This enables the rooms to be brighter, while the exceptional view through the doors means that the people access and the transporting of materials is safer and more efficient.

### **From family pharmacy to pharmaceutical giant**

The story of Abdi Ibrahim started in 1912 in the pharmacy shop owned by Abdi Nadir Ibrahim Bey in Küçük Mustafapaşa. Abdi Ibrahim Bey began manufacturing hygiene products, castor oil and similar preparations in his modest laboratory at the pharmacy. The small family pharmacy has since developed into an internationally acknowledged pharmaceuticals company which continues to be family run after over a hundred years of business.

Abdi Ibrahim strengthens its position on the international market with exports to more than 60 countries.

The company continues its growth in Kazakhstan, Algeria, Iraq, Georgia, Azerbaijan, Albania, Bosnia and Herzegovina, Portugal, Qatar, Tunisia, Saudi Arabia and the United Arab Emirates, with products from the Abdi Ibrahim brand and its in-house distribution and marketing organisations. With 650 field service and office based employees in 12 different countries, Abdi Ibrahim benefits from a wide-ranging portfolio of Abdi Ibrahim- and customer branded products in several markets all over the world, including Europe and Canada. With the worldwide distribution of licenses, the export figures of the company also continue to increase all the time.

**EFAFLEX company information**

*EFAFLEX manufactures high-speed doors for industrial applications. Founded in 1974, the company is used by customers from the world of industry, trades, food manufacturing and the chemical and pharmaceutical sectors. EFAFLEX is the only manufacturer of high-speed industrial doors to have been registered in the world market leader index and is therefore one of the 461 top companies in Germany, Austria and Switzerland. The family-owned business has more than 1,200 employees worldwide. With its headquarters in Bruckberg, Bavaria, Efaflex is firmly established as the largest employer in the region. Furthermore, with ten subsidiaries on five continents, the company is opening up international markets. More than 60 percent of EFAFLEX's revenue is generated abroad.*
